

boost::statechart::
event< EvSc >

```
classDiagram
    class boost_statechart_event["boost::statechart::event< EvSc >"]
    class sm_pack_ml_EvSc["sm_pack_ml::EvSc"]
    boost_statechart_event <|-- sm_pack_ml_EvSc
```

The diagram illustrates an inheritance relationship between two C++ classes. The base class, `boost::statechart::event< EvSc >`, is represented by a white rectangular box with a black border, divided into three horizontal sections. The top section contains the class name, while the middle and bottom sections are empty. The derived class, `sm_pack_ml::EvSc`, is represented by a gray rectangular box with a black border, also divided into three horizontal sections. The top section contains the class name, and the middle and bottom sections are filled with gray. A blue arrow with a hollow triangular head points from the top edge of the `sm_pack_ml::EvSc` box to the bottom edge of the `boost::statechart::event< EvSc >` box, indicating that `sm_pack_ml::EvSc` inherits from `boost::statechart::event< EvSc >`.

sm_pack_ml::EvSc
