

```
sm_dance_bot_strikes  
_back::StAcquireSensors  
::staticConfigure
```

```
graph LR; A["sm_dance_bot_strikes  
_back::StAcquireSensors  
::staticConfigure"] --> B["smacc2::SmaccState  
< StAcquireSensors,  
MsDanceBotRunMode >  
::static_createStateReactor"]
```

A diagram showing a call to staticConfigure from a state machine to a state reactor. On the left, a gray box contains the code: sm\_dance\_bot\_strikes \_back::StAcquireSensors ::staticConfigure. A blue arrow points from this box to a white box on the right. The white box contains the code: smacc2::SmaccState < StAcquireSensors, MsDanceBotRunMode > ::static\_createStateReactor.

```
smacc2::SmaccState  
< StAcquireSensors,  
MsDanceBotRunMode >  
::static_createStateReactor
```
