

cl\_nav2z::CpCostmapSwitch  
::disable

cl\_nav2z::CpCostmapSwitch  
::enable

cl\_nav2z::CpCostmapSwitch  
::onInitialize

cl\_nav2z::CpCostmapSwitch  
::getStandardCostmapName

```
graph LR; A[cl_nav2z::CpCostmapSwitch::disable] --> D[cl_nav2z::CpCostmapSwitch::getStandardCostmapName]; B[cl_nav2z::CpCostmapSwitch::enable] --> D; C[cl_nav2z::CpCostmapSwitch::onInitialize] --> D;
```

The diagram illustrates a dependency or relationship between four code elements. On the left, there are three white rectangular boxes, each containing a function name with its namespace: 'cl\_nav2z::CpCostmapSwitch::disable', 'cl\_nav2z::CpCostmapSwitch::enable', and 'cl\_nav2z::CpCostmapSwitch::onInitialize'. On the right, there is a single gray rectangular box containing 'cl\_nav2z::CpCostmapSwitch::getStandardCostmapName'. Three blue arrows originate from the right side of each white box and point towards the left side of the gray box, indicating that the three functions on the left are associated with or depend on the function in the gray box.
