

cl\_nav2z::CbNavigateNamed  
Waypoint::onEntry

cl\_nav2z::CbSeekWaypoint  
::onEntry

cl\_nav2z::WaypointNavigator  
::seekName

```
graph LR; A[cl_nav2z::CbNavigateNamedWaypoint::onEntry] --> C[cl_nav2z::WaypointNavigator::seekName]; B[cl_nav2z::CbSeekWaypoint::onEntry] --> C;
```

The diagram illustrates a mapping from two callback functions to a single function. On the left, there are two white rectangular boxes. The top box contains the text 'cl\_nav2z::CbNavigateNamedWaypoint::onEntry' and the bottom box contains 'cl\_nav2z::CbSeekWaypoint::onEntry'. On the right, there is a gray rectangular box containing 'cl\_nav2z::WaypointNavigator::seekName'. Two blue arrows originate from the right side of the top and bottom white boxes and point towards the left side of the gray box, indicating that both callback functions are associated with or point to the 'seekName' function of the 'WaypointNavigator' class.
