

```
cl_move_base_z::pure  
_spinning_local_planner  
::PureSpinningLocalPlanner  
::configure
```

A diagram showing a call to the `configure` method of the `PureSpinningLocalPlanner` class. The call is represented by a grey box on the left containing the code `cl_move_base_z::pure_spinning_local_planner::PureSpinningLocalPlanner::configure`. A blue arrow points from this box to a white box on the right, which contains the code `cl_move_base_z::pure_spinning_local_planner::declareOrSet`. This indicates that the `configure` method is calling the `declareOrSet` method.

```
cl_move_base_z::pure  
_spinning_local_planner  
::declareOrSet
```
