The diagram shows a class hierarchy. The base class is 'boost::statechart::event< EvWaypoint22< TSource, TOrthogonal > >'. It has two empty compartments below the name. The derived class is 'cl\_move\_base\_z::EvWaypoint22< TSource, TOrthogonal >', which is shaded gray. It has a public attribute '+ waypointIndex' in its second compartment and an empty third compartment. A blue arrow points from the derived class to the base class, indicating inheritance.
