

```
sm_dance_bot::StEventCount  
Down::staticConfigure
```

```
graph LR; A["sm_dance_bot::StEventCount  
Down::staticConfigure"] --> B["smacc2::SmaccState  
< StEventCountDown,  
MsDanceBotRunMode >  
::static_createStateReactor"]
```

A diagram showing a dependency from the `sm_dance_bot` module to the `smacc2` module. A grey box on the left contains the code `sm_dance_bot::StEventCountDown::staticConfigure`. A blue arrow points from this box to a white box on the right. The white box contains the code `smacc2::SmaccState < StEventCountDown, MsDanceBotRunMode > ::static_createStateReactor`.

```
smacc2::SmaccState  
< StEventCountDown,  
MsDanceBotRunMode >  
::static_createStateReactor
```
