

cl_move_group_interface
::CbMoveEndEffectorTrajectory
::onOrthogonalAllocation

cl_keyboard::CbDefaultKeyboard
Behavior::postKeyEvent

smacc2::ISmaccClientBehavior
::postEvent

```
graph LR; A["cl_move_group_interface::CbMoveEndEffectorTrajectory::onOrthogonalAllocation"] --> C["smacc2::ISmaccClientBehavior::postEvent"]; B["cl_keyboard::CbDefaultKeyboardBehavior::postKeyEvent"] --> C;
```

The diagram illustrates a mapping from two source functions to a single target function. Two white rectangular boxes on the left contain the source function names. Blue arrows point from each of these boxes to a single gray rectangular box on the right, which contains the target function name. The top source box contains 'cl_move_group_interface::CbMoveEndEffectorTrajectory::onOrthogonalAllocation'. The bottom source box contains 'cl_keyboard::CbDefaultKeyboardBehavior::postKeyEvent'. The target box contains 'smacc2::ISmaccClientBehavior::postEvent'.
