

smacc2/include/smacc2  
/introspection/smacc  
\_type\_info.hpp

```
graph TD; A["smacc2/include/smacc2<br/>/introspection/smacc<br/>_type_info.hpp"] --> B[map]; A --> C[memory]; A --> D[string]; A --> E[typeinfo]; A --> F[vector];
```

The diagram illustrates a header file, `smacc2/include/smacc2/introspection/smacc_type_info.hpp`, which serves as a central point for defining or managing several data types. Five blue arrows originate from the bottom of the header file box and point to five separate boxes below it, each representing a data type: `map`, `memory`, `string`, `typeinfo`, and `vector`.

map

memory

string

typeinfo

vector
