

boost::statechart::
event< EvGlobalError >

```
classDiagram
    class boost_statechart_event["boost::statechart::event< EvGlobalError >"]
    class sm_dance_bot_ev_global_error["sm_dance_bot::EvGlobalError"]
    sm_dance_bot_ev_global_error --|> boost_statechart_event
```

The diagram illustrates an inheritance relationship. At the bottom is a gray-shaded class box for `sm_dance_bot::EvGlobalError`. A blue arrow with an open triangular head points from this box to a white class box at the top for `boost::statechart::event< EvGlobalError >`. Both boxes are divided into three horizontal sections, with the top section containing the class name and the remaining two sections being empty.

sm_dance_bot::EvGlobalError
