

cl_nitrosz::CpCostmapSwitch
::disable

cl_nitrosz::CpCostmapSwitch
::enable

cl_nitrosz::CpCostmapSwitch
::onInitialize

cl_nitrosz::CpCostmapSwitch
::getStandardCostmapName

```
graph LR; A[cl_nitrosz::CpCostmapSwitch::disable] --> D[cl_nitrosz::CpCostmapSwitch::getStandardCostmapName]; B[cl_nitrosz::CpCostmapSwitch::enable] --> D; C[cl_nitrosz::CpCostmapSwitch::onInitialize] --> D;
```

The diagram illustrates a dependency or call relationship. Three source boxes on the left, each containing a function name with a namespace, have blue arrows pointing to a single target box on the right. The target box also contains a function name with the same namespace. The source boxes are labeled with ::disable, ::enable, and ::onInitialize. The target box is labeled with ::getStandardCostmapName. The target box is shaded gray, while the source boxes are white with black borders.
