

TCbRelativeMotion

```
classDiagram
    class TCbRelativeMotion {
    }
    class cl_nav2z_CbRetry["cl_nav2z::CbRetry<TCbRelativeMotion>"] {
        - odomTracker_
        + CbRetry()
        + onEntry()
    }
    cl_nav2z_CbRetry --|> TCbRelativeMotion
```

The diagram illustrates a class hierarchy. At the top is the base class `TCbRelativeMotion`, represented by a rectangle with three horizontal compartments. The top compartment contains the class name, while the two lower compartments are empty. Below it is the derived class `cl_nav2z::CbRetry<TCbRelativeMotion>`, represented by a rectangle with three horizontal compartments. The top compartment contains the class name, the middle compartment contains the private attribute `- odomTracker_`, and the bottom compartment contains the public methods `+ CbRetry()` and `+ onEntry()`. A blue arrow with an open triangular head points from the top of the derived class box to the bottom of the base class box, indicating inheritance.

cl_nav2z::CbRetry<
TCbRelativeMotion >

- odomTracker_

+ CbRetry()
+ onEntry()
