

```
boost::statechart::  
event< EvConditionalTrue  
< TReactorType, EmptyObjectTag > >
```

The diagram illustrates an inheritance relationship. A light gray box at the top represents the base class `boost::statechart::event< EvConditionalTrue< TReactorType, EmptyObjectTag > >`. A darker gray box at the bottom represents the derived class `smacc2::state_reactors::EvConditionalTrue< TReactorType, TReactorTag >`. A blue arrow points from the top of the derived class box to the bottom of the base class box, indicating that the derived class inherits from the base class.

```
smacc2::state_reactors  
::EvConditionalTrue< TReactor  
Type, TReactorTag >
```
