

smacc2/include/smacc2
/introspection/smacc
_type_info.hpp

```
graph TD; A["smacc2/include/smacc2<br/>/introspection/smacc<br/>_type_info.hpp"] --> B[map]; A --> C[memory]; A --> D[string]; A --> E[typeinfo]; A --> F[vector];
```

The diagram illustrates a central header file, `smacc2/include/smacc2/introspection/smacc_type_info.hpp`, which is associated with five data types: `map`, `memory`, `string`, `typeinfo`, and `vector`. Arrows point from the header file to each of these types, indicating that the header file defines or manages these types.

map

memory

string

typeinfo

vector
