The diagram shows a class hierarchy. The base class is `boost::statechart::event< EvWaypoint178 < TSource, TOrthogonal > >`, which is represented by a white box with a black border. It has two empty compartments below the name. The derived class is `cl_move_base_z::EvWaypoint178 < TSource, TOrthogonal >`, represented by a gray box with a black border. It has a public attribute `+ waypointIndex` in its second compartment. A blue arrow with an open triangle head points from the derived class to the base class, indicating inheritance.
