

smacc2::introspection
::SmaccEventInfo::getOrthogonalName

```
graph LR; A["smacc2::introspection  
::SmaccEventInfo::getOrthogonalName"] --> B["smacc2::introspection  
::demangleSymbol"]; B --> B;
```

The diagram illustrates a call relationship between two methods. On the left, a grey rectangular box contains the text 'smacc2::introspection' followed by '::SmaccEventInfo::getOrthogonalName' on the next line. A straight blue arrow points from the right side of this box to the left side of a second box on the right. The second box is white with a black border and contains the text 'smacc2::introspection' followed by '::demangleSymbol' on the next line. A curved blue arrow originates from the top right corner of the second box and points back to its top left corner, indicating a self-call or a recursive relationship.
