

cl_move_group_interface
::CbMoveEndEffectorTrajectory
::onOrthogonalAllocation

```
graph LR; A["cl_move_group_interface  
::CbMoveEndEffectorTrajectory  
::onOrthogonalAllocation"] --> B["cl_move_group_interface  
::CbMoveEndEffectorTrajectory  
::initializeROS"]
```

A diagram showing a transition between two states. The left state is represented by a white box with a black border containing the text 'cl_move_group_interface', '::CbMoveEndEffectorTrajectory', and '::onOrthogonalAllocation'. A blue arrow points from this box to a gray box on the right. The gray box contains the text 'cl_move_group_interface', '::CbMoveEndEffectorTrajectory', and '::initializeROS'.

cl_move_group_interface
::CbMoveEndEffectorTrajectory
