```

The diagram illustrates a call graph where two separate callback functions, `cl_nav2z::CbNavigateBackwards::onEntry` and `cl_nav2z::CbNavigateForward::onEntry`, both point to a single target function, `cl_nav2z::odom_tracker::CpOdomTracker::setStartPoint`. The target function is highlighted in a grey box, while the source functions are in white boxes. Blue arrows indicate the direction of the call flow from the source functions to the target.
