smacc2::Transition
::reactions::react_without
_action

smacc2::specificNamedOnExit

smacc2::specificNamedOnExit

```
graph LR; A["smacc2::Transition<br>::reactions::react_with<br>_action"] --> D["smacc2::specificNamedOnExit"]; B["smacc2::Transition<br>::reactions::react_without<br>_action"] --> D; C["smacc2::specificNamedOnExit"] --> D;
```

The diagram illustrates a relationship where three distinct elements on the left converge into a single element on the right. The elements on the left are: 1) A box containing 'smacc2::Transition' followed by a multi-line '::reactions::react_with_action' (with the first line truncated as 'react_with' and the second as '_action'). 2) A box containing 'smacc2::Transition' followed by a multi-line '::reactions::react_without_action' (with the first line truncated as 'react_without' and the second as '_action'). 3) A box containing 'smacc2::specificNamedOnExit'. All three of these boxes have blue arrows pointing towards a single, shaded box on the right labeled 'smacc2::specificNamedOnExit'.
