The diagram illustrates an inheritance relationship. The base class, `boost::statechart::event< EvWaypoint108 < TSource, TOrthogonal > >`, is shown in a white box with a black border. It has two empty compartments below the header. The derived class, `cl_move_base_z::EvWaypoint108 < TSource, TOrthogonal >`, is shown in a gray box with a black border. It has a header with the same signature as the base class, followed by a compartment containing the public attribute `+ waypointIndex`, and a final empty compartment. A blue arrow with an open triangular head points from the derived class box to the base class box, indicating inheritance.
