

```
sm_dance_bot_warehouse  
::StAcquireSensors::staticConfigure
```

```
graph LR; A[sm_dance_bot_warehouse::StAcquireSensors::staticConfigure] --> B[smacc2::SmaccState < StAcquireSensors, MsDanceBotRunMode >::static_createStateReactor];
```

A diagram showing a call from a static configure function to a state reactor creation function. A grey box on the left contains the text 'sm\_dance\_bot\_warehouse::StAcquireSensors::staticConfigure'. A blue arrow points from this box to a white box on the right. The white box contains the text 'smacc2::SmaccState < StAcquireSensors, MsDanceBotRunMode >::static\_createStateReactor'.

```
smacc2::SmaccState  
< StAcquireSensors,  
MsDanceBotRunMode >  
::static_createStateReactor
```
