

```
boost::statechart::  
event< EvTransitionActiveShutdown  
  < TSourceObject, TOrthogonal > >
```

The diagram illustrates an inheritance relationship between two C++ event types. A light gray box at the top represents the base class, `boost::statechart::event< EvTransitionActiveShutdown < TSourceObject, TOrthogonal > >`. A darker gray box at the bottom represents the derived class, `cl_lifecyclenode::EvTransitionActiveShutdown< TSourceObject, TOrthogonal >`. A blue arrow points from the derived class box up to the base class box, indicating that the derived class inherits from the base class.

```
cl_lifecyclenode::EvTransition  
ActiveShutdown< TSourceObject,  
  TOrthogonal >
```
