

```
boost::statechart::  
event< EvTransitionOnShutdown  
Success< TSourceObject, TOrthogonal > >
```

The diagram illustrates an inheritance relationship between two C++ event types. A light gray box at the top represents the base class, `boost::statechart::event< EvTransitionOnShutdownSuccess< TSourceObject, TOrthogonal > >`. A dark gray box at the bottom represents the derived class, `cl_lifecycle::EvTransitionOnShutdownSuccess< TSourceObject, TOrthogonal >`. A blue arrow with an open triangular head points from the derived class box up to the base class box, indicating that the derived class inherits from the base class.

```
cl_lifecycle::EvTransition  
OnShutdownSuccess< TSourceObject,  
TOrthogonal >
```
