The diagram illustrates an inheritance relationship between two event classes. The base class, `boost::statechart::event< EvGoalWaypointReached< AsyncCB, Orthogonal > >`, is shown in a white box at the top. The derived class, `cl_nav2z::EvGoalWaypointReached< AsyncCB, Orthogonal >`, is shown in a gray box at the bottom. A blue arrow with an open triangular head points from the derived class to the base class, indicating that the derived class inherits from the base class.
