

cl_move_base_z::CbPauseSlam
::onEntry

cl_move_base_z::CbResume
Slam::onEntry

cl_move_base_z::CpSlamToolbox
::getState

```
graph LR; A[cl_move_base_z::CbPauseSlam::onEntry] --> C[cl_move_base_z::CpSlamToolbox::getState]; B[cl_move_base_z::CbResumeSlam::onEntry] --> C;
```

The diagram illustrates a dependency or call relationship. Two white rectangular boxes on the left represent callback functions: 'cl_move_base_z::CbPauseSlam::onEntry' (top) and 'cl_move_base_z::CbResumeSlam::onEntry' (bottom). Two blue arrows originate from the right side of these boxes and point towards a single gray rectangular box on the right, 'cl_move_base_z::CpSlamToolbox::getState'. This indicates that both callback functions interact with or depend on the state of the 'CpSlamToolbox'.
