The diagram shows a class hierarchy. The base class, `boost::statechart::event< EvWaypoint224 < TSource, TOrthogonal > >`, is represented by a white box with a black border and is divided into three horizontal sections. The top section contains the class name. The derived class, `cl_move_base_z::EvWaypoint224 < TSource, TOrthogonal >`, is represented by a grey box with a black border and is also divided into three horizontal sections. The top section contains the class name, the middle section contains the public attribute `+ waypointIndex`, and the bottom section is empty. A blue arrow with an open triangular head points from the derived class to the base class, indicating inheritance.
