

```
boost::statechart::  
event< EvTransitionOnActivate  
Error< TSourceObject, TOrthogonal > >
```

The diagram illustrates an inheritance relationship. A light gray box at the top represents the base class `boost::statechart::event< EvTransitionOnActivateError< TSourceObject, TOrthogonal > >`. A dark gray box at the bottom represents the derived class `cl_lifecyclenode::EvTransitionOnActivateError< TSourceObject, TOrthogonal >`. A blue arrow with a hollow triangular head points from the derived class box up to the base class box, indicating that the derived class inherits from the base class.

```
cl_lifecyclenode::EvTransition  
OnActivateError< TSourceObject,  
TOrthogonal >
```
