smacc2::client_behaviors
::CbWaitNode::onEntry

smacc2::SmaccAsyncClient
Behavior::postFailureEvent

```
graph LR; A["smacc2::client_behaviors::CbWaitActionServer::onEntry"] --> C["smacc2::SmaccAsyncClientBehavior::postFailureEvent"]; B["smacc2::client_behaviors::CbWaitNode::onEntry"] --> C;
```

The diagram illustrates a call relationship between two source functions and a target function. Two white rectangular boxes on the left represent the source functions: 'smacc2::client_behaviors::CbWaitActionServer::onEntry' (top) and 'smacc2::client_behaviors::CbWaitNode::onEntry' (bottom). A single gray rectangular box on the right represents the target function: 'smacc2::SmaccAsyncClientBehavior::postFailureEvent'. Two blue arrows originate from the right side of the source boxes and point to the left side of the target box, indicating that both source functions call the target function.
