

boost::statechart::  
event< EvWaypoint131  
< TSource, TOrthogonal > >

```
classDiagram
    class Base["boost::statechart::event< EvWaypoint131< TSource, TOrthogonal > >"]
    class Derived["cl_move_base_z::EvWaypoint131< TSource, TOrthogonal >"]
    Derived --|> Base
```

The diagram illustrates an inheritance relationship. A blue arrow with an open triangular head points from the bottom class to the top class. The top class is white with a black border and contains the text 'boost::statechart::event< EvWaypoint131< TSource, TOrthogonal > >'. It is divided into three horizontal sections by thin black lines. The bottom section is empty. The bottom class is gray with a black border and contains the text 'cl\_move\_base\_z::EvWaypoint131< TSource, TOrthogonal >' and '+ waypointIndex'. It is also divided into three horizontal sections by thin black lines. The top section contains the class name and template parameters, the middle section contains the public member variable, and the bottom section is empty.

cl\_move\_base\_z::EvWaypoint131  
< TSource, TOrthogonal >

+ waypointIndex
