

cl_move_base_z::CbNavigate
Backwards::onEntry

sm_dance_bot::radial
_motion_states::StiRadialReturn
::onExit

cl_move_base_z::odom
_tracker::OdomTracker
::clearPath

```
graph LR; A["cl_move_base_z::CbNavigate Backwards::onEntry"] --> C["cl_move_base_z::odom_tracker::OdomTracker::clearPath"]; B["sm_dance_bot::radial _motion_states::StiRadialReturn::onExit"] --> C;
```

The diagram illustrates a control flow or data flow between three components. On the left, there are two white rectangular boxes. The top box contains the text 'cl_move_base_z::CbNavigate Backwards::onEntry'. The bottom box contains the text 'sm_dance_bot::radial _motion_states::StiRadialReturn::onExit'. On the right, there is a gray rectangular box containing the text 'cl_move_base_z::odom_tracker::OdomTracker::clearPath'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both the top and bottom components trigger or call the 'clearPath' method of the 'OdomTracker'.
